

ADVANCED DISASTER LIFE SUPPORT

ADLS® is an advanced practicum course for the trained BDLS® provider. It is an intensive, 2-day course that allows students to demonstrate competencies in casualty decontamination, specified essential skills, and mass casualty incident information systems/technology applications. Using simulated, all-hazards scenarios and mass casualty incidents, ADLS® makes use of four interactive sessions in which participants treat simulated patients in various disaster drills and situations. Training is focused on the development of hands-on skills to allow participants to apply the knowledge learned in BDLS®.
